## Summary

Full stack software developer with 9 years of experience. Passionate about clean code, code performance, multithreading, new technologies and features.

## Education

---

### Bachelor in Computer Science

2016 - 2021

University of Caxias do Sul – *Caxias do Sul, Rio Grande do Sul, Brazil.*

### High School Graduated

2012 - 2014

Murialdo - *Caxias do Sul, Rio Grande do Sul, Brazil.*

## Professional Experience

---

### Fourge Tech, Porto Alegre, Brazil - Remote

May 2024 – Current

#### Sênior Java Developer | 2024 – Current

- Currently working as an external developer and consultant for Unimed Porto Alegre, contributing to the Gestão Pró platform (<https://gestaopro.unimedpoa.com.br/>). My responsibilities include: integrating the software with partner APIs (such as TOTVS and CRM); developing reactive Java microservices using Mono/Flux; creating and modifying database artifacts in Oracle SQL and MongoDB (NoSQL).

I primarily work with Java 11+, Node.js, SQL, and NoSQL, utilizing frameworks and technologies such as Spring Boot 2+, Git, Azure DevOps, Tomcat, Netty, Gradle, Postman, Kubernetes (k8s) and Grafana.

### Zallpy, Porto Alegre, Brazil - Remote

July 2021 – May 2024

#### Sênior Java Developer | 2021 – 2024

- Accepted the challenge of working in an outsourcing company, where I served as an external developer for Ticket Log®, part of the French group Edenred®. I was solely responsible within the Capture and Authorization Squad, handling: integration of external partner services with our system via REST APIs; analysis and translation of byte arrays in the ISO8583 format for system data flow; maintenance and innovation in team-owned systems, such as Capture, Router, and Authorize; migration of an on-premise system to a microservices architecture; development of automated unit tests and modifications to Oracle and Sybase database artifacts.

During this period, I primarily worked with Java 8, Java 17, and SQL (Oracle PL/SQL and Sybase). Additionally, I utilized frameworks and technologies such as Spring Boot 3+, Git, Azure DevOps, JBoss, Tomcat, Maven, JUnit, Mockito, H2, Flyway, Jenkins, SonarQube, CVS and Postman.

**TOTVS, Caxias do Sul, Brazil**

**April 2019 – July 2021**

### **Full Stack Web Developer | 2019 – 2021**

- Worked on the Service and Contracts Squads, focusing on innovation, maintenance, and legal compliance for modules such as medical auditing, authorization, guide management, beneficiaries, contracts, and the company portal.

As a full-stack developer, I was responsible for: implementing system interfaces on the front end; developing REST APIs for backend communication; performing code reviews and testing for team members; contributing biweekly to the automated testing guild, improving testing solutions and metrics for developers; working with agile methodologies, including Scrum reviews, plannings, and refinements.

I primarily used TypeScript (Angular 2+), Java (Spring Boot), Progress 4GL, and Oracle PL/SQL, along with technologies and tools such as PO-UI, HTML5, CSS, Jenkins (Groovy for jobs/pipelines), SonarQube, Postman and TFS.

**CIGAM PRODALY, Caxias do Sul, Brazil**

**May 2016 – April 2019**

### **Full Stack Developer | 2017 – 2019**

- After being hired, I worked as a Junior Developer on the implementation and analysis of innovations, maintenance, and legal compliance, focusing on the Gas Station Management module of the CIGAM ERP.

I was responsible for projects such as the implementation of the PAF/ECF legislation, integrating ERP data with a POS SITEF machine for sales in gas station management workflows, and developing a web application for fleet management for clients.

I primarily worked with Magic, SQL (MSSQL and Oracle PL/SQL), C# (ASP.NET), and JavaScript. I also utilized technologies like Chart.js, HTML5, CSS (Bootstrap) and IIS.

### **Intern | 2016 – 2017**

- Worked on implementing innovations and maintaining the Accounting and Gas Station Management modules of the CIGAM ERP. Gained experience with the low-code language Magic and SQL (MSSQL and Oracle PL/SQL).

## Technical Skills

---

- Languages: (*proficient*): Java, Typescript, Javascript, Progress (*familiar*): C#, C, Python, Magic, Groovy.
- Databases: (*proficient*): Oracle, MSSQL. (*familiar*): MongoDB, SQLite, PostgreSQL.
- Frameworks/Libraries: (*proficient*): Spring boot 2+, Angular 2+ (*familiar*): NestJs.
- Version Control: Github, TFS.
- Services: REST APIs, JSON, SOAP.
- Concepts: Object-oriented design, SOLID principles, design patterns.
- Tools: SoapUI, Postman, NPM, IIS.
- Servers: Netty, JBoss, Node.js, Tomcat.
